CALIFORNIA PROPOSITION 65 DECLARATION

This declaration is to inform users of Industrial Gas Springs products that to the best of our knowledge product produced by Industrial Gas Springs do not contain chemicals in a format that can cause harm to health* including those which are listed on California's Safe Drinking Water & Toxic Enforcement Act of 1986. This Act, commonly known as Proposition 65 (Prop 65), establishes a list of chemicals which the state of California's risk assessment process has determined to present a risk of cancer, birth defects or other reproductive harm. The Proposition 65 chemical list can be found at:

<https://oehha.ca.gov/proposition-65/proposition-65-list>

Industrial Gas Springs is committed to providing safe, high quality products for all our concerned parties. We have worked with our vendors and our supply chain partners to ensure the purchase of raw materials that will meet Prop 65 standards.

Industrial Gas Springs will continue to monitor the Proposition 65 regulations for any new chemicals. Industrial Gas Springs will compare any newly listed chemicals with the raw materials in our finished product and communicate this information to our concerned parties where necessary.

Signed on behalf of Industrial Gas Springs

Mark Bryant – QHSE Manager

Dated May 16, 2019

* Industrial Gas Springs products can include stainless steel parts that, as part of the alloy contain Nickel.

This is a required constituent of Stainless Steel and as such is part of the alloyed ingredients that make up 316 SS and 304 SS. Findings from the Finnish Institute of Occupational Health indicate that the amount of Nickel that leaches from Stainless Steel is below the measurable amount when tested in artificial sweat (results of the <45um size particles as Industrial Gas Springs product does not produce particles of material and is a solid).
