

## Conflict Minerals Policy Statement 2018

Industrial Gas Springs does not manufacture or use any electrical / electronic components in its products, so consequently it does not directly purchase or use any “Conflict Minerals”.

Conflict minerals refers to gold, as well as tin, tantalum, and tungsten, the derivatives of cassiterite, columbite-tantalite, and wolframite, regardless of where they are sourced, processed or sold. The OECD may designate other minerals in the future. We support these requirements to further the humanitarian goal of ending violent conflict in the Democratic Republic of the Congo (DRC) and in surrounding countries, which has been partially financed by the exploitation and trade of “conflict minerals”.

It is not anticipated that Industrial Gas Springs will use any conflict minerals in future in its products.

Dated and signed: 26/02/2018
